Approaching Multiliteracies: Digitally Mediated Second and Foreign Language Teacher Education Carolyn Blume, 2025-10-15 Approaching Multiliteracies Digitally Mediated Second and Foreign Language Teacher Education provides practical insights into developing the multiliteracies pedagogy competencies for pre-service teachers. It highlights how multiliteracies pedagogy can be not just a goal of teacher education but also a means to prepare future language teachers for this task. Capitalizing on parallels between multiliteracies pedagogy and current models of second and foreign language teacher education (SFLTE), the chapters in the book illustrate how teacher educators in Europe, Asia, and the United States connect new forms of digitally mediated communication with principles of initial professionalization. Integrating examples from their own practice with empirical analysis, a team of international contributors provide models of instruction that can be adapted for a variety of settings. This edited collection examines a range of methodological approaches from engaging in identity work to the use of corpora that cultivate future language teachers' dispositions and skills in integrating multiliteracies into foreign language classrooms in ways that are contextually situated, critical, and digitally mediated. Primarily designed for individuals involved in language teacher education, the book will also be a key resource for in-service professional development opportunities focusing on contemporary language learning and use, as well as for researchers interested in efficacious models of SFLTE.

Nalepa, Roy Fairstein, Roxana Radulescu, 2023-10-15 Artificial intelligence or AI now affects the day to day life of almost everyone on the planet and continues to be a perennial hot topic in the news. This book presents the proceedings of ECAI 2023 the 26th European Conference on Artificial Intelligence and of PAIS 2023 the 12th Conference on Prestigious Applications of Intelligent Systems held from 30 September to 4 October 2023 and on 3 October 2023 respectively in Kraków Poland. Since 1974 ECAI has been the premier venue for presenting AI research in Europe and this annual conference has become the place for researchers and practitioners of AI to discuss the latest trends and challenges in all subfields of AI and to demonstrate innovative applications and uses of advanced AI technology. ECAI 2023 received 1896 submissions a record number of which 1691 were retained for review ultimately resulting in an acceptance rate of 23%. The 390 papers included here cover topics including machine learning natural language processing multi agent systems and vision and knowledge representation and reasoning. PAIS 2023 received 17 submissions of which 10 were accepted after a rigorous review process. Those 10 papers cover topics ranging from fostering better working environments behavior modeling and citizen science to large language models and neuro symbolic applications and are also included here. Presenting a comprehensive overview of current research and developments in AI the book will be of interest to all those working in the field. *Proceedings of the Future Technologies Conference (FTC) 2023, Volume 1* Kohei Arai, 2023-11-01 This book is a collection of thoroughly well researched studies presented at the Eighth Future Technologies Conference.
