Communicational Tool in Romantic Relationships of European and North American Adolescents and Young

Adults Max Korbmacher, 2018-02-01 Bachelor Thesis from the year 2017 in the subject Communications Interpersonal Communication grade 1.7 University of Bremen Department of Sociology course B A Sociology language English abstract A relatively small amount of research addresses romantic relationship communication on Facebook However the aim of this literature review was to conclude current research about romantic relationship communication of European and North American adolescents and young adults on Facebook Communication behaviours were observed in Knapp s 1978 three

relational stages formation maintenance and dissolution Facebook was found to be a significant communicational tool for adolescents and young adults in romantic relationships Findings displayed that not only communication between partners but also between couple and network influence relationship outcomes The availability of information can lead to dialectical struggles between relationship partners Baxter 2011 and high levels of social control from romantic relationship partners networks A special importance of Facebook was found in the relationship formation where Facebook serves as the main tool to communicate and to gather information about potential and existing partners Relationship maintenance on Facebook requires publications of relationship information The frequency and importance of those publications depends on the relationship partners and their Facebook networks No research has been conducted on relationship dissolutions on Facebook yet Although research on behaviours after the dissolution revealed that former partners cleared their profiles from information connected to ex partners Harassment and monitoring of ex partners were also reported behaviours More research is needed to provide sufficient evidence to validate the presented data Additionally only a small amount of research addresses the reliability of offline behaviour and links between offline and online behaviour in the field of romantic relationships

The Upside of Inequality Edward Conard, 2016-09-13 The scourge of America's economy isn't the success of the 1 percent quite the opposite The real problem is the government's well meaning but misguided attempt to reduce the payoffs for success Four years ago Edward Conard wrote a controversial bestseller Unintended Consequences which set the record straight on the financial crisis of 2008 and explained why U.S. growth was accelerating relative to other high wage economies He warned that loose monetary policy would produce neither growth nor inflation that expansionary fiscal policy would have no lasting benefit on growth in the aftermath of the crisis and that ill advised attempts to rein in banking based on misplaced blame would slow an already weak

recovery Unfortunately he was right Now he s back with another provocative argument that our current obsession with income inequality is misguided and will only slow growth further Using fact based logic Conard tracks the implications of an economy now constrained by both its capacity for risk taking and by a shortage of properly trained talent rather than by labor or capital as was the case historically He uses this fresh perspective to challenge the conclusions of liberal economists like Larry Summers and Joseph Stiglitz and the myths of crony capitalism more broadly Instead he argues that the growing wealth of most successful Americans is not to blame for the stagnating incomes of the middle and working classes If anything the success of the 1 percent has put upward pressure on employment and wages Conard argues that high payoffs for success motivate talent to get the training and take the risks that gradually loosen the constraints to growth Well meaning attempts to decrease inequality through redistribution dull these incentives gradually hurting not just the 1 percent but everyone else as well Conard outlines a plan for growing middle and working class wages in an economy with a near infinite supply of labor that is shifting from capital intensive manufacturing to knowledge intensive innovation driven fields He urges us to stop blaming the success of the 1 percent for slow wage growth and embrace the upside of inequality faster growth and greater prosperity for everyone

Net Pioneers 1.0 Dieter Daniels, Gunther Reisinger, 2009. Net Pioneers 1.0 discusses media art history with a new interdisciplinary look at the historical, social, and economic dynamics of our contemporary networked society. The hype around Net-based art began in the

early 1990s before the Internet had become a commodity It developed in skeptical parallel to the rise and decline of the new economy But why does this chapter of art history appear to end so suddenly Is it that the idea of Net based art involving itself in a revolutionary spirit in a networked society failed One might equally well argue that it was far too successful simply to become another media art genre Looking today at the social aesthetic and conceptual approaches of the early 1990s presented in this book it is clear that most of them have in fact come true if in ways other than intended The contributions cover a wide variety of topics ranging from art scholarly methodological debate Bentkowska Kafel Kuni source critical analysis Reisinger archiving exhibition and analytical practice Ernst London Paul Sakrowski to media philosophical aspects Ries and technical and artistic innovations Daniels R sum de l diteur *The Money Club Revised & Updated* Frances Beck, 2013-02-01 Everything you need to know about how to set up a successful investment club of your own for friendship and for profit In 1998 members of a book club decided they wanted to find out more about the stockmarket and to make some money from it They knew little about investing but were determined to learn and the sheba investment network was born Now over fifteen years later its members are so savvy at investing that they have a brilliant 30% to 35% returns rate And just as important they are laughing all the way to the market Meetings take place once a month with a bottle or two of wine and much lively discussion The Money Club tells you exactly how they did it and how you can too With a contribution of 50 to 75 a month this is an investment within most people s reach And because you re not doing it alone you can learn more quickly and make better choices No matter where in Australia you are Dianne Di Frances and Emily cover everything you ll need to know to set up a successful investment club of your own for friendship and for profit
