interests and the need to fuel consumerism on which corporate profits depend. But the power plays now occurring in the arena of sports are by no means solely a matter of money. At issue as well in the media capture of sports are the values that inform our daily lives, the physical and emotional health of the population and the symbols so long central to a sense of Canadian identity. Writing from a variety of perspectives the contributors to this collection set out to explore the impact of the media on our reception of and attitudes toward sports to unpack the meanings that sports have for us as citizens and consumers. Some contributors probe the function of sports as spectacle, the escalation of violence, controversies over drug use and the media's coverage of tragic deaths while others shed light on the way in which the media serve to transform sports into a vehicle for the expression of identity and nationalism. The goal is not to score points but to prompt critical discussion of why sports matter in Canadian life and culture and how they contribute to the construction of identity.

### **Defining Sport**

Shawn E. Klein, 2016-12-14 *Defining Sport: Conceptions and Borderlines* is not about the variations of usage of the term sport. It is about the concept the range of activities in the world that we unite into one idea sport. It is through the project of defining sport that we can come to understand these activities better how they are similar or different and how they relate to other human endeavors. This definitional inquiry and the deeper appreciation and apprehension of sport that follows is the core of this volume. Part I examines several of the standard and influential approaches to defining sport. Part II uses these approaches to examine various challenging borderline cases. These chapters examine the interplay of the borderline cases with the definition and provide a more thorough and clearer understanding of both the definition and the given cases. This work is not meant to be the definitive or exhaustive account of sport. It is meant to inspire further thought and debate on just what sport is how it relates to other activities and human endeavors and what we can learn about ourselves through the study of sport. This book will be of interest to scholars in philosophy of sport history, communications, sociology, psychology, sports management, cultural studies and physical education.

### *Sport in Journalism and Fiction in the United States Today*

Karsten Senkbeil, 2007-04-30 Thesis M A from the year 2005 in the subject American Studies Culture and Applied Geography grade 10 University of Osnabrück language English abstract. This book with the title *Sports in Journalism and Fiction in the United States Today* by Karsten Senkbeil analyzes the imagery and rhetoric in the public representation of the two most popular American sports namely Baseball and American Football. The research is twofold on the one hand a corpus consisting of journalistic texts which appeared on the internet and dealt with one of these sports was assembled and quantitative and qualitative analyses of the rhetoric in these texts was executed with software tools from Corpus Linguistics. Central concern was the analysis in respect of national ideology and myth, commercialization and imagery of heroism. On the other hand a hermeneutic literary analysis of works by contemporary American authors DeLillo, Coover, Roth and others which had sport as a central topic examined whether and how the imagery and rhetoric found in the corpus analysis was mirrored and critically dealt with on a literary level. Results are manifold. Both sports the modern and aggressive American Football and the pastoral

conservative baseball turn out to be recognized as emblematic expressions of typical American values As national pastimes they are more than distractuve spectacles but inherit and re enact parts of American national ideology Militaristic and imperialistic undertones are often found in the corpus and these attitudes are critically and ironically reflected by literary authors An examination of religious metaphors showed how mass media spectator sport has acquired a status of quasi religious myth making its values and belief systems intermixing with and superimposing on classic religious and national myths Commercialization in sports and economic globalization is greeted with suspicion by both sports journalists and authors Instead American professional sport turns out to be a spectacle built around folk heroes whose status and media representation shows how the American public cherishes individual success As Apollonian and Dionysian heroes athletes succeed by embodying genius and creativity at the same time orderliness and conservatism    The Daily Film Renter and Moving Picture News ,1944    **Vanity Fair** ,2015    **TV Guide** ,2003    **The USA Today Way** John K.
