various other components connected to an Arduino Uno and a Raspberry Pi and uses OpenCV and Python software for face detection and recognition In the second chapter authors compares and evaluates the main characteristics of 5G channels and the performance of two channel coding candidates low density parity check LDPC codes and polar codes The analysis considers block error rate bit error rate computational complexity and flexibility and finds that polar codes outperform LDPC code systems though LDPC is still a viable option compared to other code systems The third chapter focuses on how to reliably process and store DNA sequences in EHR systems without any modifications To achieve this the authors introduce a coding technique and evaluate its effectiveness using the Hamming code and Reed Solomon coding schemes on a sample data set The results show that the Reed Solomon coding scheme outperforms the Hamming code in terms of error detection and correction for securely processing DNA records to EHR systems The next chapter investigates the robustness of AI models trained on thyroid ultrasound images using different convolutional neural network CNN architectures VGG19 Xception ResNet50V2 and EfficientNetB2 against adversarial attacks using the fast gradient sign method FGSM basic iterative method BIM and projected gradient descent PGD techniques In the fifth chapter it was questioned whether artificial intelligence could write an academic article In this direction an academic article was created and evaluated by OpenAI ChatGPT The final chapter proposes an application to measure RF signal intensities in urban areas and use that information to estimate the amount of energy that can be harvested from these signals This information is then presented to users through a geographical information system   Gen AI, Authorship and the Law Mira Moldawer,2026-02-03 This book interrogates the legal and cultural dimensions of persona authorship particularly in the context of publicity rights and the growing regulatory response to generative artificial intelligence Gen AI In an era of rapid technological advancement and evolving legal frameworks this book provides a groundbreaking analysis of the intersections between text authorship and vocabulary Through an innovative application of the if value then right IVTR principle the book deconstructs the shifting foundations of authorship in Western legal thought It examines the persona as a cultural text unrecognized by copyright law the hybrid nature of publicity rights authorship and the influence of postmodern vocabulary on legal adjudication Crucially it critically engages with the exclusion of Gen AI from authorship highlighting how legal doctrine rather than objective artistic neutrality determines creative legitimacy Bridging copyright and trademark law this book argues for a re evaluation of the balance between persona authorship and cultural control offering a compelling framework for understanding the future of intellectual property in the digital age It challenges conventional narratives and proposes new pathways for navigating authorship in a technologically mediated world The book will be of interest to anyone interested in the evolution of intellectual property law the intersection between law and culture and the impact of law and culture on the unique dilemmas posed by artificial intelligence   **OpenAI Solutions** Ashok Brardwaj,2024-03-13 Unlock the power of OpenAI and transform your ideas into intelligent applications with OpenAI Solutions Transforming Ideas into Intelligent Applications This
