Experiment Station Report, 1975 Report of the 90-day Study on Human Exploration of the Moon and Mars United States, 1989 Public Health Service Bibliography Series, 1965 Specifications Grading 2.0 Linda B. Nilson, Joseph A. Packowski, 2025-09-15 This second edition of the alternative grading classic revisits specs grading with a robust body of research exemplars and strategies to elevate the quality of student work, increase engagement and buy-in, reduce faculty stress, and cultivate students' career competencies. Nilson and Packowski present the unique characteristics of the specs grading schema, all of which simplify faculty decision-making, reduce antagonism between the evaluator and the evaluated, and increase student receptivity to meaningful feedback, thus facilitating a mutually beneficial, rigorous learning process. Used consistently over time, specs grading can restore credibility to grades by demonstrating and making transparent to all stakeholders the learning outcomes that students achieve. This book features five new chapters stemming from firsthand accounts of dozens of instructors actively using specs grading and new material in six of the remaining eight chapters. It lays out the surprisingly simple transition process, positioning specs grading as the most viable and easy-to-use system available to faculty.

Current Index to Journals in Education, 1980 The Science Teacher, 1967 Some issues are accompanied by a CD ROM on a selected topic. Government Research Directory, 2010 JBIS, 1977 Annual Index/Abstracts of SAE Technical Papers, 2006 The Russian Space Program Terry C Treadwell, 2026-01-30 This is not the definitive work on the Russian space program but it will give the reader an insight into a political and complex world of space science. Although the success of the high-profile American space program had grabbed all the headlines, Russia slowly but consistently has continued to expand their contribution to the exploration of space. Since the phasing out of the Space Shuttle, it is the Russians that now have the main responsibility to replace the crewmembers and take supplies to the space station, although now the American SpaceX program has eased that burden. The book covers the early triumphs and disasters of the Russian space program and the animals that helped pave the way, although the casualties never came to light until many years later, when the understanding and tensions between the East and West eased. Despite the number of setbacks that dogged the early years, Russia slowly developed spacecraft that, although considered by some to be very basic, were reliable. The development of the Salyut and Mir space stations created a closer understanding between the nations; the work and experiments carried out by the cosmonauts in these early space stations were almost all military and were either secret or restricted, so little is known about them. However, with the arrival of the International Space Station, came a degree of openness and great strides were made in the understanding of the physiological and psychological effects of the men and

women involved in working in space and a weightless environment Unfortunately since the war in the Ukraine Russia's relationship with the West has deteriorated considerably and co operation within the space program is very limited although the two main powers have reached an agreement regarding the transportation of crews and supplies to the ISS It is thought however that the International Space Station days are numbered and will close in 2031 The book also makes reference to only a small number of Kosmos missions those mentioned are the only ones with any connection to space exploration The remainder and there have been over 2 500 Kosmos missions were either military or scientific satellites Library & Information Science Abstracts ,1972 **Merrill Earth Science** Ralph M.
