**Logistics and Power** Susan Zieger,2025-09-09 From supply chains to surveillance how logistics drives modern power and its consequences Movement is the lifeblood of capital even more so than growth If goods people and information don t flow then profits don t either Ensuring that laborers shipping containers media commercially valuable data and much else are in the right place at the right time demands a subtle choreography Enter logistics Susan Zieger argues that logistics is the foundation of power in our time Blending detailed historical research with real life stories that crystallize the human and ecological consequences of supply chains Logistics and Power shows how the pursuit of efficient movement has come to organize economies while

disordering societies and selves Logistics emerges as the key to consumerism and the experience of work It justifies corporate and police surveillance illuminates patterns of migration and exploitation and explains why the oceans are clotted with plastic It is in the sphere of logistics that capitalist motives are most dramatically in tension with planetary needs A headfirst encounter with the obscure forces subordinating all goals below those of capital Logistics and Power points the way to an alternative a mindful and politically attentive kind of movement compatible with human thriving **Byung-Chul Han**

Brodersen,2024-09-23 How does automation affect us our environment and our imaginations What actions should we take in response to automation Beyond grand narratives and technology driven visions of the future what more can automation offer With these questions in mind The De Gruyter Handbook of Automated Futures provides a framework for thinking about and implementing automation differently It consolidates automated futures as an inter and transdisciplinary research field embedding the imaginaries interactions and impacts of automation technology within their social historical societal cultural and political contexts Promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate

with rather than resist automation agendas It does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing technologies Instead the handbook demonstrates how the humanities and social sciences are essential to the design and governance of sustainable sociotechnical systems Methodologically the handbook is underpinned by a pedagogical approach to staging co learning and co creation of automated futures with rather than simply for people In this way the handbook encourages readers to explore new and alternative modes of research fostering a deeper engagement with the evolving landscape of automation    **The Literary Digest** ,1907    **The Woman Citizen** ,1923
