

Developmental Psychology

Final Exam Study Guide

1. 4 developmental perspectives:

- a. Biological Perspective: intellectual, physical, personality, and motor development are rooted in biology
 - i. Maturation Theory- Arnold Gessell
 - Child development reflects a specific or prearranged plan within the body (experience matters little); development is a natural unfolding of a pre determined biological/developmental timetable
 - Nature/nurture? Nature
 - Active/passive? Active (mechanism within child is responsible for their development)
 - Continuous/discontinuous? Discontinuous
 - ii. Ethological Theory- Konrad Lorenz
 - Views development from an evolutionary perspective (adaptive behaviors=survival value)
 - a. Inherited adaptive behaviors
 - b. Even though underlying mechanism is biological, experience is essential for triggering programmed adaptive behaviors
 - Critical period: time in development when a specific type of learning can occur
 - a. Lorenz studied critical periods using chicks and imprinting
 - b. Biologically programmed to follow first object they see because it is adaptive
 - Nature/nurture? Nature
 - Active/passive? Passive
 - Continuous/discontinuous? Discontinuous (due to early critical period)
- b. Learning Perspective: Emphasize experience in child development (agree with Locke's idea of "tabula rasa")
 - i. John Watson—behaviorism/learning perspective
 - Learning determines child development (**experience)
 - Nature/nurture? Nurture
 - Active/passive? Passive
 - Continuous/discontinuous? Continuous
 - ii. B.F. Skinner—operant conditioning
 - Emphasizes role of reinforcement and punishment (behavioral consequences determine behavior)
 - a. Reinforcement: consequences that increase future likelihood of a behavior
 - i. Positive reinforcement=giving reward
 - ii. Negative reinforcement=taking away something unpleasant
 - b. Punishment: consequences that decrease future likelihood of a behavior
 - BUT limited because children also learn by imitation or observational learning (Bandura)
 - iii. Bandura—social cognitive theory
 - Emphasizes children's efforts to understand their world, using reinforcement, punishment, and other's behavior
