the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure. Learners may experience cognitive overload, metacognitive illusion and low learning efficiency in self-regulated learning. It follows that in the post-COVID 19 era, online learning puts forward new requirements and challenges to contemporary students, not only to their learning strategies but positive character traits in learning. Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation, then possibly leading to inefficient learning and increased learning burden. Therefore, it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays, based on which we could construct a theoretical model of efficient learning model.

Claiming Your Victories Linda S. Hjorth, 2000. Written to accommodate brief or one-credit student success courses, this new text is especially useful to career college programs and returning adult students. Topics of particular value to this audience include coverage of parenting job and time management issues. In addition, the text's concise format enables busy students to quickly read, practice and assimilate the skills essential to college success. Supportive pedagogy includes chapter opening Checklists, Quick Check margin boxes with questions to reinforce understanding, and chapter ending Reviews with numbers that correlate to original chapter objectives. Step Inside offers a tour of available resources on college campuses. A Role Play exercise in each chapter allows students to express perceptions about themselves, others, and the world around them while reinforcing teamwork and group interaction. An Internet exercise in each chapter makes a connection between the use of technology resources and student success strategies.

Mastering Mathematics Richard Manning Smith, 1994. MASTERING MATHEMATICS offers specific, concrete methods for succeeding in math courses. The book begins with a diagnostic questionnaire to help students determine the areas where they need the most improvement in their approach and study habits for math. Part I deals with attitude; Part II gives practical advice on how to handle class time, class notes, study time, and homework; Part III deals with preparing for exams.
