

Psychology 450 chapter 14 Study Guide

What is social facilitation?

tendency for people to do better on simple tasks and worse on complex tasks when they are in the presence of other people

What is the BEST explanation for why the presence of others leads to an individual's dominant response?

evaluation apprehension

the concern that being judged creates arousal

What determines whether the presence of others facilitates, or interferes with performance?

strengthens tendency to perform dominant or well-learned response

If dominant response is correct = performance is improved

If dominant response is wrong = performance is impaired

What kind of practical advice can we give people about learning different kinds of tasks, based on our understanding of social facilitation research?

others (even supportive others) should NEVER be around when we are learning a difficult task (unless they are teaching us)

What is social loafing and why do people do it?

People exert less effort when working with others than when working alone

as the number of people in the group or team increase, people tend to feel deindividuation

How can you reduce individual's likelihood of socially loafing?

monitor individual efforts.

emphasize the importance of individual pride and unique contributions.

determine specific situations in which loafing may occur.

conduct individual meetings to discuss loafing.

assign players to other positions.

Study Guide and Workbook to Accompany Zimbardo and Weber's Psychology, Second Edition Peter C. Gram, Philip G. Zimbardo, 1997 Psychology Third Edition builds upon the experience and reputations of Phil Zimbardo and Ann Weber with the addition of a new co author Bob Johnson who has a wealth of teaching experience at the community college level This briefer less expensive book presents psychology in a meaningful manageable format that focuses on the key questions and core concepts of psychology Introductory psychology covers such a wide range of topics and issues that it becomes difficult for readers to see the forest for the trees To make key psychological concepts more meaningful the authors found inspiration in a classic chess study This study showed that experts did no better than novices at remembering the location of pieces on a chess board when they were placed randomly Only when the patterns represented actual game situations did they make sense and therefore become more easily memorable for the experts Clearly meaningful patterns are easier to remember and understand than random arrangements and Psychology applies this by presenting the field of psychology in meaningful patterns to enhance comprehension These concepts are then applied to readers own lives study skills and the world around them Finally Psychology integrates a cross cultural and multicultural perspective to make psychology meaningful for everyone For anyone interested in Introductory Psychology
