## SCIENCE

### What you need to know about the GED® Science Test

- 1** You should be familiar with basic science concepts, but you're not expected to have in-depth knowledge of each topic.  
Remember, the science test is not a memorization test! You don't need to know the entire periodic table of elements or the number of bones in the human body.
- 2** You'll need to understand science concepts, use logic and reasoning to interpret information, and draw conclusions (which is using your critical thinking skills in science). This study guide and the example questions in it will help you get an idea of what's going to be on the test.
- 3** You don't need to know everything in this guide! If you want to see how close you are to passing, the GED Ready® official practice test is a great way to help you determine if you're ready.

### Test Overview

Canada's major trading partners. From the mid 1980s until 2012 Canadian studies was seen as an important tool of soft power increasing awareness of Canadian culture, institutions and history. The abrupt termination in 2012 of the Canadian government's financial support for these activities triggered a debate that is still ongoing about the benefits that may have flowed from this support and whether the decision should be reversed. The contributors to this book focus on the process whereby Canadian studies became institutionalized in their respective countries and on the balance between what might be described as Canadian studies for its own sake versus Canadian studies as a deliberate instrument of cultural diplomacy.
