Tiktok Same Day Delivery Store Hours:

Empowering Women in the Digital Economy Sheena Lovia Boateng, Richard Boateng, Thomas Anning-Dorson, 2023-08-25

This book presents multidisciplinary perspectives on opportunities and best practices necessary for empowering women in the digital economy in developing countries. The book explores the components of connectivity that matter most to women. It also helps decision makers and policymakers to adopt the policies needed to empower women in using digital platforms and developing and taking up careers in the digital economy in developing economies. In response we gathered eight contributions or chapters on new directions, strategies and barriers to women's empowerment through digital technologies. The contributions span thematic areas such as female digital entrepreneurship, social media and agricultural value chains, women in the gig economy, the digital divide, gender disparities in cryptocurrencies and digital access in agriculture. In précis, the contributions argue that first, appropriate legislation matters, but it is not enough; there is a need to alter social and cultural attitudes and raise awareness. Second, there is a need to address affordability. Government and development agencies may begin by offering free or discounted smart devices to rural women and appropriate digital skills training relevant to their economic activities. Third, there is a need for urgent attention by government labor agencies in developing countries to enforce decent working conditions and protection for female gig workers while maximizing opportunities being offered through these platforms. Don't just leave women to use digital platforms and services; support them with sound policies and programs for responsible and sustainable use. In effect, this book offers clarity on new strategies, case studies, examples and lessons in addressing or circumventing institutional challenges to women's empowerment through digital technologies.

Entrepreneurship Today Swati Bhatt, 2022-10-27. This book explores how the U.S. has been in the throes of a startup revolution fueled by a risk-taking culture. There has been a growth of young startup from 1994 accelerating after 2010 through the present day. Most entrepreneurial activity is in the professional and business services sector which comprises technical services as well as research and development. However, new establishments face a low survival rate suggesting that starting businesses is not the problem; sustaining their development and growth is the principal challenge. A paradox is presented by the simultaneous presence of declining labor force participation rate among prime working age adults, a decrease in productivity growth rates in the past decade and a startup revolution. There are five native skills that are acquired by experience rather than formal education: resourcefulness, practical intelligence, over optimism and personal initiative. These are built on a foundation of attributes that form the culture of risk taking and decision making. Underlying values and beliefs include collaboration, openness to new ideas, an awareness of the environment and the needs of people in your radius of interaction. A strongly embedded community forms the essence of entrepreneurial culture and its values cannot be taught; they must be learned through experience. **Content Inc., Second Edition: Start a Content-First Business, Build a Massive Audience and Become Radically Successful (With Little to No Money)** Joe
