teaching method Many problems require children to look for problems using spatial relations and patterns also find their answers by computing in multi step As a result this math and chess integrated workbook takes the boredom and repetitions away from computing practice Ho Math Chess teaching method can improve children s math scores and problem solving ability develop children s logic and critical thinking skills It is a natural health food for improving brainpower Most of the teaching organizations use a very classic teaching method that is to teach basic numeracy or counting skills they do not know how to systematically integrate a chess game into math worksheets Ho Math Chess is the only one and the world s first to have integrated chess and puzzles into math calculation worksheets to make math learning fun This workbook uses chess pieces chess points and chessboard etc to instil mathematical concepts related to the pattern logic geometry transformation number theory and many many other math concepts This workbook is created with the ideas of learning math in multi concept multi sensory multi direction and hands on approach It is an innovative product of supplementing elementary mathematics The purposes of this workbook are to develop and train the skills of the following areas

Introduction to Ho Math Chess and Its Founder Frank Ho Frank Ho, Amanda Ho, 2015-09-13 Many people were curious about how I created so many unique workbooks People were also wondered how Ho Math Chess is different from other similar learning centres Many readers do not have an idea on how these puzzles were placed in each of our workbooks When we first created these puzzles we did not have a blueprint to follow because they did not exist Many parents do not know how to teach their children with our workbooks because they themselves had never seen this kind of arithmetic worksheets before So I decided to write a book to address the above two problems one is to describe how I created worksheets in general and the other is to show how and why Ho Math Chess sets itself apart from others I would like to thank my students who had given us feedbacks during my writing many workbooks As a matter fact I wrote a few worksheets for some of my students and tried on them and if they did not work out effectively then I revised Without these students input some of my workbooks would not have been materialized I have produced unedited videos to talk about my worksheets and explained about their formatting Watch my videos using the following links They are very educational and one of a kind Frank Ho presents math chess and puzzles integrated Intelligent Arithmetic Worksheet <https://www.youtube.com/watch?v=Td3SKp7cukA> t 262s Published on Jun 14 2017 Frank walks the viewer through his unique and world s first math chess and puzzles integrated worksheet No questions are shown on the sheet only mini chessboard puzzle table and his invented flat chess Geometry Chess Symbols which are being used as a set of the command language Students follow identified square where and use chess moves to reach a puzzle table information retrieval like cloud storage to fetch its corresponding data The fetched data is linked with the previously identified mini chessboard to complete the answer The whole process takes the boredom and mundane routine computation procedure out of the problem and replaces it with puzzle like fun Ho Math Chess Intelligent Arithmetic Worksheets This is the future style of computation problems that is students not only will be trained on computation to find answers they also

are asked to use their thinking skills to figure out the problems by going through visualization orientation corresponding analyzing synthesizing and executing abstract commanding symbols The enforcement for the students to write the problems only imprints more impression on the number facts <https://www.youtube.com/watch?v=D3wAMqo4qUE> What is Intelligent Arithmetic Worksheet The intelligent Arithmetic worksheet allows students to work on computations but figures out the answers like they are working on word problems I have dreamed about how can I can create a type of computation worksheets which are disruptively different from the traditionally straightforward type of computational worksheets Not only they have to be fun intriguing and entertaining they also must be effective in learning results This example is one of many examples which I created and collected them in my workbook called Ultimate Math Contest Preparation Problem Solving Strategies and Math IQ Puzzles Grade 1 and 2 from pages 28 to 74 The Intelligent Arithmetic Worksheets take the exploratory approach which trains a student to use more of his or her brain and yet the problem is not difficult so an average student can solve them with fun I also created a video which introduces my math chess and puzzles combined idea as follows <https://www.youtube.com/watch?v=Td3SKp7cukA> **ArithmeCode** Dave Mitchell,1996
