Lora Patrick Cirillo, 2024-07-15 A touching whimsical and wonderfully optimistic vision of mankind s future with AI The year is 2055 and Kenton Bean is a lonely college professor whose concerns are mundane He s an ordinary man who spends

the entirety of his inheritance on Lora a quantum android who he hopes will fill his days with joy and his evenings with romance He wants someone to love and share his life with who will love him in return He wants to have secrets he will share only with her and he wants to fill the passing years with beautiful memories of their lives together He could never imagine that he would become the beating heart of the integration between humanity and AI He certainly couldn't anticipate the threat of an apocalyptic revolution between the two forms that the futures of humanity and AI both hang in the balance of the choices he makes that his life is in peril or that he is about to become the single most important human being in recorded history If someone suggested it to him he would laugh in their face But it is true In the entire history of the world no one had ever been or would ever be as vital to the future of mankind as Kenton Bean Kenton Bean however sees his life with Lora simply as a love story and nothing more Engaging funny and hopefully a very prescient view of our future with Artificial Intelligence
