The Doom Loop Eswar S. Prasad, 2026-02-05 Globalisation and its institutions have failed to adapt to today's political economic realities What went wrong and how can we reverse our descent into chaos The United States once the world's undisputed superpower is losing its dominant position Rising economies like China and India increasingly exert their influence the West's share of global GDP consistently declines and America's rules based system risks becoming irrelevant In business competition brings efficiency balance and innovation But in the marketplace for global power things look rather different Acclaimed economist Eswar S Prasad argues that the very forces expected to stabilise the world order are fuelling disarray Instead of promoting shared prosperity globalisation has deepened inequality in many countries stoked political backlash and prompted escalating trade wars Economic institutions like the International Monetary Fund and World Trade Organization founded to foster cooperation have failed to adapt to twenty first century realities The ascent of middle powers like South Africa Brazil and Indonesia once suggested a stable multipolar future but today such economies are forced to pick sides in an intensifying US China struggle for hegemony In clear eyed bracing prose Prasad contends that we are caught in a destructive feedback loop between economics domestic politics and geopolitics As instability becomes the status quo we need radical new solutions to reinvigorate the world economy prioritise common aspirations and reverse our downward spiral into disaster
