The Sacred Chain Jim

Stump,2024-04-02 In this marvelously accessible book philosopher Christian Jim Stump provides the reader with new eyes for a journey through time the origin of the soul suffering and morality and reveals how the latest scientific findings about what it means to be human have led him to a deeper and more authentic faith Francis S Collins Director of the Human Genome Project and Founder of BioLogos author of The Language of God A thought provoking and eye opening work by Jim

Stump Vice President at BioLogos and host of the Language of God podcast offering a compelling argument about how evolution does not have to be at odds with faith but can actually enrich and deepen it In this moving and deeply thoughtful book Jim Stump takes readers with him on his journey to understanding evolution and reconciling it with his faith The Sacred Chain draws on philosophy theology and the latest scientific research to tackle some of the biggest questions facing humanity and people of faith today such as How can we hold the Bible as a sacred text and yet reconcile modern science with it By condensing noteworthy events in the history of our universe into one calendar week what can we learn about God s creative process and priorities and where humans fit in If humans are created in the image of God what does evolution have to teach us about our species and our place in creation What about the soul How can we understand our transcendent qualities if the human body is the product of evolution How does evolutionary science help us understand how God might use pain and suffering for important and good purposes Does it have to be one or the other science or religion or is there a third way one that not only preserves faith in the face of modern science but leads to a stronger more relevant and more authentic faith Deeply researched and a delight to read The Sacred Chain provides clarity in our uncertain times revealing a bigger picture of our world and our place within it It is a panorama consistent with the scientific findings about who we are and where we come from that can actually bolster our faith as it engages our curiosity about ourselves our universe and the nature of existence itself
