Higher Education in the United States James J. F. Forest, Kevin Kinser, 2002-06-21 Surveys the changing landscape of American higher education from academic freedom to virtual universities from campus crime to Pell Grants from the Student Privacy Act to student diversity In the years following World War II college and university enrollment doubled students revolted faculty unionized and community colleges evolved Tuition and technology soared as did the number of first generation minority and women students These changes radically transformed the American system of postsecondary education Today that system is in trouble Its aging professoriate prepares for retirement but low academic salaries can no longer attract the best minds to replace them A flood of corporate dollars funds commercial research but money for basic research the seedbed of American scientific preeminence has dried up Colleges and universities also face heated competition with for profit education providers for students faculty and external financial support along with the costs of providing remedial education to growing numbers of students who are unprepared for postsecondary education Higher Education in the United States provides a comprehensive analysis of these issues and others that scholars and practitioners of higher education study discuss and grapple with on a daily basis Kiplinger's Personal Finance, 2009-03 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics **Never Too Late** Rebecca Klein-Collins, 2018-12-18 A smart snappy and comprehensive guide for the millions of adults who are thinking about going or going back to college and want to know how to do it right As anyone who has done it knows going back to school is a major undertaking For younger and older adults alike starting or returning to school presents different challenges than those encountered by teens fresh out of high school and heading straight to college Countless Americans take on this task while working raising kids caring for parents volunteering serving in the military and in some cases all of the above Although the non traditional undergraduate student is in fact the new normal the glut of college guides out there don t include practical advice for the busy moms frustrated employees and ambitious adults who are applying to college or hoping to finish earning a degree **Never Too Late** will help readers jump start a new professional path or speed down the one they re already on by guiding them through vital questions What should I study How can I afford the time and money required to get a college degree How do I compare schools With key chapters on flexibility It s About Time and Face to Face or Cyberspace and rankings of the best colleges for grown ups diving back into the books **Never Too Late** is an essential reference for adults seeking a richer life and a meaningful place in our rapidly changing economy and world **Higher Education at Risk** Sandra Featherman, 2023-07-03 Sandra Featherman believes that colleges are in denial about the severity of the threats to the current model of higher education Based on her own experience as a president as a trustee and as a board member who has worked in private and public universities and on interviews with the presidents of major institutions she offers both a trenchant analysis of those threats and clear prescriptions about the

painful but necessary decisions that colleges need to make to ensure they remain viable accessible and affordable and deliver a high quality education Sandra Featherman considers higher education to be at a game changing moment When markets don t function well as is the case with today s college marketplace with offerings that cost too much and return too little it opens the door to new types of suppliers who offer new ways of providing what students are looking for particularly the increasing cohort of mature working students In the face of new competitors for profit education companies technology start ups and foreign universities vying for international students trustees and senior level administrators are generally stuck in a traditional ethos and with decision making processes unsuited to these times They know what used to work and find it easier to follow old ways than to make the difficult transition to new ways of delivering education She lays out a strategy that emphasizes the centrality of students and how to provide them with the most effective learning environment that is clear eyed about focusing on the core missions and abandoning practices that constrain or impede them and that requires constant self monitoring to learn from and act upon what works She offers a blueprint for redesigning institutions for paring away what is unnecessary and cost ineffective and for adopting the best technologies all in the service of developing meaningful degree programs at an affordable price and widening access for under represented groups She ranges over the implications of budget decisions accreditation and MOOCs addresses government regulation and tuition costs presents promising new models and concludes with 11 key recommendations that should be heeded by all higher education administrators and trustees
