TEXT BOOK OF ARTIFICIAL INTELLIGENCE Dr. Rakesh Singh, Dr. Shuchi Dave, Prof. Sushil K. Kashaw, Prof. (Dr.) Sandeep Gangrade, Lalbihari Barik, 2025-04-25 Textbook of Artificial Intelligence is a comprehensive guide for students, educators, and professionals seeking foundational and advanced knowledge in AI. It begins with a clear definition and history of Artificial Intelligence helping readers understand its roots and evolution. The book explores real world applications of AI across various industries including healthcare, finance, education, and autonomous systems. Core AI branches like Machine Learning, Deep Learning, NLP, Robotics, and Computer Vision are introduced with practical insights. In depth coverage of Intelligent Agents explains their structure, types, and operating environments. The Problem Solving section walks readers through classic algorithms like BFS, DFS, A* and adversarial search techniques. Knowledge Representation and Reasoning introduces propositional logic, predicate logic, semantic nets, and uncertainty models like Bayesian networks. Machine Learning fundamentals cover supervised, unsupervised, and reinforcement learning alongside key algorithms and neural networks. Advanced topics like CNNs, RNNs, Transformers, GANs, and NLP tasks are well structured for deeper understanding. Dedicated chapters on AI in real world applications showcase use cases in robotics, vision, and recommender systems. Hands on tools like TensorFlow, PyTorch, Keras, and data handling with Pandas and NumPy are introduced for practical learning. The book encourages ethical thinking with discussions on AI fairness, privacy, transparency, and regulation. A special focus on the future of AI covers trends like generative models, autonomous agents, and human-AI collaboration. Well organized content helps learners connect theory to practical implementation and innovation. Step by step examples and algorithm breakdowns

agentic intelligence can transform raw enterprise data into hyper personalized actionable insights. This book introduces a practical framework for building AI powered agent swarms that operate across six critical dimensions of business dark data empowering intelligent automation, decision augmentation and strategic foresight at unprecedented scale. In an age when data is underutilized, organizations are overwhelmed by complexity, latency and fragmentation. Traditional analytics pipelines fall short in handling dynamic environments and human centric demands. This book addresses this critical gap by detailing how autonomous Gen AI agents built on foundational disciplines of data engineering, data science and machine learning can process, personalize and operationalize hidden insights buried deep within enterprise systems. The six dimensions presented in the book form a cognitive and computational blueprint that guides the design, deployment and evolution of agentic swarms. Each dimension focuses on a specific mode of intelligence such as contextual reasoning, emotional alignment or real time adaptive sensing and shows how AI agents can specialize within each domain to maximize business impact. Readers won't just learn theory; they'll explore field tested methodologies to deploy Gen AI powered solutions at enterprise scale. From zoned data lakes and transformer models to swarm governance and consensus mechanisms, the book walks readers through the full life cycle of building intelligent systems that learn, evolve and act with purpose. What makes this book essential and unlike others in the market is that the author is not writing from the sidelines. He is actively architecting and delivering these systems today with firsthand insight into what works, what fails and what the future holds. The methodology presented blends system design, human aligned AI, industrial automation and trusted decision making, offering readers a rich and practical road map for AI first enterprise innovation. **What You Will Learn:** How to structure AI powered agents across six interlinked cognitive and computational dimensions to effectively process dark data and deliver hyper personalized real time business insights. Practical knowledge on how to orchestrate swarms of Gen AI agents governed by Councils that collaboratively manage complexity, detect emerging patterns and operate autonomously in enterprise environments. The foundational and advanced skills required to implement generative AI and agent based intelligence within large scale multi cloud and hybrid business ecosystems.

Who This Book is For: This book is designed for professionals and practitioners operating at the intersection of artificial intelligence and business transformation. It is ideal for AI developers, data scientists, solution architects, enterprise engineers and technical managers who are looking to move beyond the hype of generative AI and apply it meaningfully within industrial and enterprise grade ecosystems.
