**Leadership 2.0 in processes of a sustainable change** Prof. Dr. Michael Kurwan, 2025-06-30 Document from the year  
2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully  
implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a  
company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the  
long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the  
leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which  
is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2.0  
in which it is important to retain top performers and in particular key personnel in the company in the long term which is a  
very challenging leadership task in HR management In change processes a fundamental distinction must be made between  
incremental change management and radical change management While incremental change takes place continuously and is  
integrated into everyday working life radical change represents a strategic realignment of the company which is largely  
associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of  
restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees  
are more willing to go along with incremental change also known as continuous improvement than radical change as they  
could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover      *The
