[Affordances and Constraints of Mobile Phone Use in English Language Arts Classrooms](#) Moran, Clarice M., 2020-12-25 The use of phones in the classroom is a controversial topic that receives a variety of reactions and can have political ramifications In various school districts across different states as well as in some countries cell phone usage has been banned in the classroom to combat what administrators say is a distracted student population However research

demonstrates that cell phones can have a positive effect on learning and engagement. Instead of banning cell phones, some teachers have found ways to incorporate educational apps, gaming apps, and social media into course materials. Although much research has emerged involving the integration of technology and digital literacies in English language arts (ELA) classrooms, mobile phone use as a discrete construct has not been explored widely. *Affordances and Constraints of Mobile Phone Use in English Language Arts Classrooms* aims to shine a light on the controversial topic of mobile phones in the English language arts classroom, focusing on comparing the opportunities that they afford students as well as the negative effects they can have on learning. The chapters within this book examine learning outcomes, best practices, and practical applications for using mobile phones in ELA and add to the body of literature on mobile phone use in secondary classrooms in general, standing as a unique resource on mobile phones in the language arts curriculum. While highlighting topics that include gaming applications, online learning, student engagement, and classroom management, this book is ideally designed for inservice and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students who are interested in learning more about the pluses and minuses of mobile phone use in ELA. **Higher grounds**

Patience Adjekai Sowa, PhD, Rachel Jordan, Wendi Ralaingita, Benjamin Piper, 2021-05-23. To address chronically low primary school completion rates and the disconnect between learners' skills at the end of primary school and the skills learners need to thrive in secondary school, identified in many low and middle income countries, more investment is needed to improve the quality of teaching and learning in upper primary grades. Accordingly, we provide guidelines for improving five components of upper primary education: 1. In-service teacher professional development and pre-service preparation to improve and enhance teacher quality; 2. a focus on mathematics literacy and core content area subjects; 3. assessment for learning; 4. high quality teaching and learning materials; and 5. positive school climates. We provide foundational guiding principles and recommendations for intervention design and implementation for each component. Additionally, we discuss and propose how to structure and design pre-service teacher preparation and in-service teacher training and ongoing support, fortified by materials design and assessment to help teachers determine where learners are in developmental progressions, move learners towards mastery, and differentiate and support learners who have fallen behind. We provide additional suggestions for integrating a whole school climate, curriculum, social emotional learning, and school-related gender-based violence prevention strategies to address the internal and societal changes learners often face as they enter upper primary. **99**
