Baker, 2021-04-03 New clinical cases enlarged photographs new abstracts and algorithms and more make the 4th Edition of Local Flaps in Facial Reconstruction your state of the art resource for achieving optimal results for the full range of facial flap procedures. It offers detailed visual guidance and unmatched expertise from prominent surgeons in facial plastic surgery, ophthalmology and dermatology reflecting the multi specialty nature of this dynamic field. Full color clinical photographs and line drawings along with high quality surgical video clips capture the latest most effective facial reconstruction practices and methods. Clearly demonstrates practical and effective methods of reconstruction of skin defects in a variety of sizes, configurations and locations on the head and neck. Covers the basic concepts of flap physiology, design and mechanics of flap transfer including multiple clinical examples for each flap. The second section describes the use of local flaps in reconstruction of individual facial structures including the auricles, lips, eyelids, cheeks, forehead and nose. Contains many new clinical cases, new abstracts preceding each chapter, new algorithms for selecting the preferred local flap, an updated and expanded bibliography, newer approaches to facial reconstruction and enlarged photographs to better view flap design, planes of dissection and methods of flap transfer. Offers new, more complex clinical cases of nasal reconstruction as well as updated coverage of new wound closure techniques and materials. Includes an outstanding video library demonstrating the design, dissection and transfer of the majority of local flaps and grafts currently in use today accompanied by expert commentary. Features more than 2,300 superb illustrations and photographs of rotation flaps, transposition flaps, advancement flaps, bilobe flaps, melolabial flaps, paramedian forehead flaps, rhombic flaps and mucosal flaps.

*Skin Flaps in Facial Surgery* Daniel Buchen, 2006-12-25 Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity or access to any online entitlements included with the product. Sharpen your facial surgery skills by mastering the design and execution of flaps. This practical, all-encompassing sourcebook demystifies the planning and execution of flaps for anyone performing facial surgery. Written by leading facial surgery experts, the book starts with an introductory chapter that highlights the basic principles common to all flaps. Next, you'll get an in-depth look at flap physiology and random flap patterns such as advancement and rotation flaps, split and full thickness grafts, the repair of eyelids, ears and lips, the replacement of nasal lining and support and free flaps. The high-yield coverage features multiple options for any procedure and is supported by a quick access format that features lines and arrows superimposed on full color patient photos, a convenient tool that helps you visualize the design and movement of flaps. Features: A step-by-step technique driven presentation that deepens your understanding of facial surgery involving flaps; A skill building presentation of multiple close options including the pros and cons of each; A graphic outline of each flap accompanied by patient photos that include superimposed lines and arrows showing how the flap is designed; Highly instructive, up-to-date chapters on random pattern flaps, advancement, rotation, transposition and interpolation flaps.
