**The Wall Street Journal**, 2005 **Business Bulletin, Industrial, Agricultural, Financial, Mercantile** La Salle Extension University, 1928 **Dry Goods Reporter and Midwest Merchant-economist**, 1904 **Sleeping with Literary Lions** Peggy Van Hulsteyn, 1997

TRAV Van Hulsteyn, a travel editor for *Mademoiselle*, entertainingly describes literary homes, haunts, museums and any available bed and breakfasts in or near them. She has organized her work by state, though only 35 of the 50 are included, with California having the most entries. Sometimes she lists only a site and no accommodations. To be included, an author has to be deceased and be one that Van Hulsteyn enjoys reading. Poe appears five times, Twain seven, and Van Hulsteyn says she had to look hard to find the 12 women writers she added in. Location entries include whom to contact, hours of operation, entrance fees and so on, and what one will find there. The bed and breakfast entries give room rate ranges, number of rooms and bathrooms, wheelchair accessibility and the like. The descriptions are delightful, information filled, positively critical and free of any apparent bias.

**Ethics in the AI, Technology, and Information Age** Michael Boylan, Wanda Teays, 2022-05-11

Increasingly, technology, the Internet and social media are playing a major part in our lives. What should we think about the ethical issues that arise, such as the changing role of intelligent machines in this Information Age? The impact of technology upon society is a perennial question, but the power of computing and artificial intelligence has ratcheted up the ethical implications of this relationship. It merits careful consideration. *Ethics in the AI, Technology, and Information Age* brings together a cohort of international scholars to explore the ethical ramifications of the latest technologies and their effects on our lives. This it does in three parts: 1. theoretical considerations, 2. practical applications, and 3. challenges. Beginning with theoretical essays, the book investigates the relationship between technology and nature, the limits of being human versus machine, and the moral implications of artificial intelligence. The book then examines key questions such as ownership of technology, artificial intelligence's replacement of human jobs and functions, privacy and cybersecurity, the ethics of self-driving cars, and the problematic aspects of drone warfare. With an appendix of films and documentaries to inspire further discussion on these topics, students and scholars will find *Ethics in the AI, Technology, and Information Age* an essential and engaging resource both in the classroom and in their daily technology-filled lives.
