

# Least Common Multiple

The least common multiple (LCM) is the smallest integer that two or more numbers share as a multiple. The name itself tells you what the skill is:

## Least Common Multiple

Meaning smallest  
(or least) number

Meaning shared between  
two or more numbers

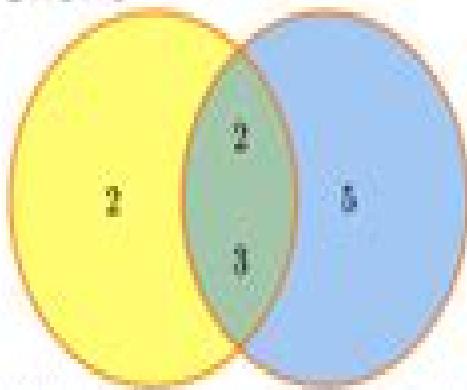

Meaning the product  
of two integers

### Example

$$12 = 2 \times 2 \times 3$$

$$30 = 2 \times 3 \times 5$$

Here, you have the prime factors of 12 and 30.

- The yellow section represents the prime factors of 12 that are not prime factors of 30 (which is just the prime factor of 2).
- The blue section represents the prime factors of 30 that are not prime factors of 12 (which is just the prime factor of 5).
- The green intersection represents the prime factors of 12 and 30 (2 and 3).

The least common multiple of 12 and 30 is equal to the product of all the factors viewed in the Venn diagram.

$$\text{The least common multiple is } 2 \times 2 \times 3 \times 5 = 60.$$
