in the first century The current contributors investigate various areas where increasing linguistic data and changing perspectives have moved Hebrew out of a restricted marginal status within first century language use and the impact on New Testament studies Five articles relate to the general sociolinguistic situation in the land of Israel during the first century while three articles present literary studies that interact with the language background The final three contributions demonstrate the impact this new understanding has on the reading of Gospel texts *An Illustrated Guide to Gastrointestinal Motility* Devinder Kumar,David L.
