State Transformations in OECD Countries H. Rothgang, Steffen Schneider, 2015-03-23 The democratic nation state of the post war era has undergone major transformations since the 1970s and political authority has been both internationalized and privatized The thirteen chapters of this edited collection deal with major transformations of governance arrangements and state responsibilities in the countries of the OECD world A unified conceptual and explanatory framework is used to describe trajectories of state change to explain the internationalization or privatization of responsibilities in the resource law legitimacy and welfare dimensions of the democratic nation state and to probe the state's role in the today's post national constellation of political authority As the contributions show an unravelling of state authority has indeed occurred but the state nevertheless continues to play a key role in emerging governance arrangements Hence it is not merely a victim of globalization and other driving forces of change

Does an unconditional basic income provide higher effectiveness and efficiency? An Analysis of the social security systems of Germany, Sweden and the United Kingdom Wolfgang Müller, 2014-02-01 The current social security systems in Europe have not been able to deal with increased traditional and new risks such as unemployment or work life balance One suggested solution to this problem has gained more popular and academic support in recent years the idea of a universal unconditional basic income UBI This study therefore examines whether and how UBI could support social security systems in the UK Germany and Sweden in order to achieve their aims and fulfill their functions Since effectiveness and efficiency describe the functionality of social security systems the study focuses on these two aspects These aspects will be used to theoretically discuss expected effects of UBI along with the main aims and functions of key policies in each country in regard to their effectiveness and efficiency In comparison with current social security schemes in each country the study demonstrates that UBI is able to deal more effectively with several traditional and new risks despite problems with higher expectations and living standards UBI provides basic needs and supports people in need
