the range of the phenomena which can be analyzed using the tools of this semantic paradigm so as to include for instance paradoxes The volume covers topics such as the philosophical significance of different criteria of identity of proofs and adequacy conditions for an intensional account of the notion of harmony The author also examines the Prawitz Tennant analysis of paradoxes by investigating on the one hand the prospects of turning it into a theory of meaning for paradoxical languages and on the other hand two distinct kinds of phenomena first observed by Crabbe and Ekman showing that the Tennant Prawitz criterion for paradoxicality overgenerates This volume is of interest to scholars in formal and philosophical logic    **Garden Life** ,1922    The Farmer's Weekly ,1930    *The Electrical World and Engineer* ,1903    Parliamentary Papers Great Britain.
