A Business History of Retail Bettina Liverant,2024-09-05 Although transformations in retailing are of tremendous current interest there is no single broad ranging account of the evolution of retailing formats A Business History of Retail fills this gap providing a chronological presentation of changes in retail businesses and shopping experiences from pre industrial times to the present Retailing is explored as both an economic and a cultural phenomenon tracing retail strategies and business operations as they are reconfigured by retailers adapting to changing conditions new technologies government policies and evolving markets Relationships between the makers sellers and buyers of goods are shaped and reshaped as retailers large and small respond to competition and pursue new opportunities Areas of continuity are identified even as businesses grow and strategies evolve After four centuries there are more retailers selling more merchandise in more ways to more customers The mass consumption of goods and services is central to American and Canadian history and understanding consumer society requires understanding retailing Combining original research with recent scholarship in business and social history cultural theory and readings in current retail business strategy this study provides a valuable resource for students and scholars in a wide range of fields and will appeal to general readers with an interest in retail shopping and consumerism    Ebook: Advertising and Promotion Belch,2014-09-16 Ebook Advertising and Promotion

The Overworked Consumer Christopher K. Andrews,2018-12-11 The Overworked Consumer examines how the growing use of self service technology in the U S economy has contributed to Americans feelings of busyness and overwork by asking them to perform a variety of tasks in work like settings for free Focusing on the adoption of self checkout lanes in the retail food industry the book describes how self service technology is changing the meaning of service in an economy where the boundaries between work and leisure are becoming increasingly blurred Are big businesses simply being cheap and lazy preferring to automate and outsource work to unpaid consumers instead of raising wages or is self service and its do it yourself ethos a response to consumers demands for faster easier ways of buying goods and services And what exactly are shoppers getting when they go through the self checkout lane Is it really faster than the cashier lane or just another illusory speed up meant to distract them from the realization that they are performing unpaid work unwitting participants in a new retail experiment whose roots can be traced back to the very invention of the modern supermarket And what about the effect on jobs is this the end of the checkout line for cashiers and similar forms of work or are such anxieties over automation overstated To answer these questions the author takes readers inside SuperFood a regional supermarket chain drawing upon extensive interviews with managers staff and customers as well as an array of examples retail studies and statistics to separate fact from fiction and figure out what is actually happening in stores Concluding with a cautionary tale of two grocers the author suggests the future of retailing is still undetermined meaning shoppers still have time to decide whether or not they really want to do it yourself Caveat emptor    **Franchise Times** ,2008    **Innovations in Functional**
