

PRESENTATION – INTRODUCTION AND OVERVIEW

1. *Training on evaluation of pesticide residues*

Introduction

2. *Objectives of the training workshop*

- To introduce the topics with specific examples and to provide sufficient background for people to appreciate the detailed information in the JMPR Manual.
- To show the logic in and critical aspects of the evaluation process.
- To point out the importance of applying basic science and past experience in correctly interpreting experimental data and to avoid reaching non-valid conclusions.
- To assist performing evaluation of pesticide residue data at national level where a comprehensive pesticide registration process is not in place.

3. *Background*

- The procedures involved in the estimation of maximum residue levels and dietary exposure assessment have become very complex.
- The FAO Manual (first published in 1997 and revised in 2002 and 2009) provides a comprehensive description of the requirements and operation principles of JMPR. It has also been very useful to national authorities administering pesticide regulations.
- However, someone unfamiliar with the terminology may not be able to make the best use of the JMPR Manual.
- The FAO has received requests for preparing a training manual for and providing training in evaluation of pesticide residues.
- The FAO/WHO Training Manual on Pesticide Specifications, first issued in 2008, was also an inspiration to produce a training manual on pesticide residues.

4. *Basic principles of JMPR operation*

- JMPR procedures continue to evolve. Every year changes are recorded in JMPR Reports as general considerations. It is a strength of JMPR that it develops the science as issues are foreseen.
- The guidelines and methods developed are applicable in the context of their origins and they should not be extrapolated too far. There is no reason to expect them to apply more widely than in the situations envisaged at the time they were formulated.
- The JMPR operates as a team making best use of the different experience and scientific knowledge of its members.

5. *Overview of pesticide evaluation process*
