Trees In The Urban Landscape Principles And Practice:

Trees in the Urban Landscape Anthony Bradshaw,1995 **Trees** P. A. Thomas,2000-02-13 Trees are familiar components of many landscapes vital to the healthy functioning of the global ecosystem and unparalleled in the range of materials which they provide for human use Yet how much do we really understand about how they work This 2000 book provides a comprehensive introduction to the natural history of trees presenting information on all aspects of tree biology and ecology in an easy to read and concise text Fascinating insights into the workings of these everyday plants are uncovered throughout the book with questions such as how are trees designed how do they grow and reproduce and why do they eventually die tackled in an illuminating way Written for a non technical audience the book is nonetheless rigorous in its treatment and will therefore provide a valuable source of reference for beginning students as well as those with a less formal interest in this fascinating group of plants

Landscape Trees and Shrubs Mary Forrest,2006-01-01 Illustrated with numerous drawings and photographs this book presents a horticultural overview of the main plant families of trees and shrubs from temperate regions that are cultivated in urban and rural landscape schemes Most of the plants used come from a limited number of plant families and within these families certain genera contribute very significantly The largest chapter in the book describes 37 plant families according to their identification functional use and management in landscape schemes With this information readers will be able to assess the suitability of species and prepare planting designs for prevailing sites

Plant User Handbook James Hitchmough,Ken Fieldhouse,2008-04-15 Professional landscapers and all those involved in creating green spaces have long been in need of a book that is a guide to plant specification but also makes sense of plants and their cultivation Plant User Handbook is for practitioners who are professionally engaged in the use of plants in public commercial and institutional landscapes Planting schemes are undertaken on the basis of a binding contract generally between the client who owns or leases the landscape and the implementer the landscape contractor with the designer acting both as specifier and contract administrator Within this contractual relationship planting schemes must be implemented to an agreed timetable To manage this procedure efficiently landscape designers and managers need quick access to the factual and scientific background for practical planting design and its implementation through specification writing and contracts The book covers over 20 well defined topics and is written by leading experts in the industry It is arranged into five sections Preliminaries to plant use and the landscape Managing plant growth on landscape sites Establishment and management of trees Establishment and management of smaller woody plants Establishment and management of herbaceous plants Carefully illustrated with diagrams black and white photographs and colour plates this handbook provides a unique resource for professionals wanting to improve their specification skills as well as to explore creative approaches to design and practical implementation
