chemical equilibrium definition equation facts britannica - Dec 07 2022

web chemical equilibrium condition in the course of a reversible chemical reaction in which no net change in the amounts of reactants and products occurs a reversible chemical reaction is one in which the products as soon as they are formed react to produce the original reactants

introduction to reversible reactions and chemical equilibria - Apr 11 2023

web an introduction to reversible reactions and chemical equilibria this page starts with a couple of simple reversible reactions and then extends it to what happens if such a reaction is in a closed system introducing the important idea of a dynamic equilibrium

7 1 reversible reactions and chemical equilibria - Aug 15 2023

web although a system at equilibrium appears static on a macroscopic level it is important to remember that the forward and the reverse reactions continue to occur a reaction at equilibrium exists in a steady state in which the rate at which a species forms equals the rate at which it is consumed

reversible reaction wikipedia - Jan 08 2023

web a reversible reaction is a reaction in which the conversion of reactants to products and the conversion of products to reactants occur simultaneously 1 a and b can react to form c and d or in the reverse reaction c and d can react to form a and b this is distinct from a reversible process in thermodynamics
