### **Good Meal Prep Ideas For Beginners and Dummies**

Barbara Dawson, 2020-08-18

Much prepping is meal planning a meal or recipe then portioning it out to store and grab meals for later. If you've ever kept leftovers from dinner to take with you for lunch the next day you've learned mini meal prepping. Generally, meal prepping refers to preparing 3-7 days worth of food at a time. Think of it like keeping lunches for the week all at once instead of keeping lunches for the week all at once. You can use this same technique for breakfast, lunch, dinner, and snacks. Meal prepping prevents food waste and reduces time spent on food preparation outside of meal times. Whether you plan a day or a budget, when keeping a meal plan, it's important to consider convenience and cost more than convenience. With meal prepping, you get to eat the same thing for a week so if you don't like leftovers or get bored with food, meal prepping is not for you. If having time to maximize your time and budget is important, then meal prepping every night is not for you. It's generally seen as a meal for the whole family. Meal planning for a week would be quite difficult but preparing meals in advance would reduce meal times. A meal is stored in the refrigerator for a slow down in taste. In addition to the way food is packed, the individual nuances of your refrigerator and your taste can impact the taste of your meal. Safe food is the most acceptable thing in texture and flavor. Always begin with the refrigerator guidelines set by the FDA and then follow them according to your own preferences. In general, I don't like meals that last for days, worth it to a meal. I find that food that is stored in the refrigerator for a week is not as good as meal prepping.
