conditions After being caught and killed the poor creatures are disguised as fish or snakes and smuggled into traditional medicine shops From there pangolin scales are sold to willing customers at huge prices In fact it s been estimated that the illegal trade in pangolins is worth about 19 billion a year Due to this unlawful hunting the number of pangolins still left in the wild has dropped dramatically Though no one is sure precisely how many are left far fewer sightings of wild pangolins along with the surge in illegal trade suggest that some species are very close to extinction Unless drastic action is taken the pangolin s 80 million year existence might soon come to a premature end
