Next-Level Data Science Jason Brownlee,Vinod

Chugani,2024-11-04 Data science is a relatively new term coined in the past decade While it shares much in common with traditional statistics it warrants its own name as modern computer technology has introduced tools that can tackle challenges previously unsolvable such as machine learning models However these new tools demand new techniques You might be surprised to find that even slight adjustments to hyperparameters or changes in data preprocessing can significantly alter a model s output This ebook concentrates on two fundamental yet widely applicable models in data science linear regression and decision trees The focus here isn t just to explain these models but to use them as examples illustrating the key considerations you should bear in mind when working on a data science project Next Level Data Science is designed to help you cultivate an effective mindset for data science projects enabling you to work more efficiently Written in the approachable and engaging style you know from Machine Learning Mastery this ebook will guide you on where to start and what to prioritize when drawing insights from data

Data Science for Supply Chain Forecasting Nicolas

Vandeput,2021-03-22 Using data science in order to solve a problem requires a scientific mindset more than coding skills Data Science for Supply Chain Forecasting Second Edition contends that a true scientific method which includes experimentation observation and constant questioning must be applied to supply chains to achieve excellence in demand forecasting This second edition adds more than 45 percent extra content with four new chapters including an introduction to neural networks and the forecast value added framework Part I focuses on statistical traditional models Part II on machine learning and the all new Part III discusses demand forecasting process management The various chapters focus on both forecast models and new concepts such as metrics underfitting overfitting outliers feature optimization and external demand drivers The book is replete with do it yourself sections with implementations provided in Python and Excel for the statistical models to show the readers how to apply these models themselves This hands on book covering the entire range of forecasting from the basics all the way to leading edge models will benefit supply chain practitioners forecasters and analysts looking to go the extra mile with demand forecasting Events around the book Link to a De Gruyter Online Event in which the author Nicolas Vandeput together with Stefan de Kok supply chain innovator and CEO of Wahupa Spyros Makridakis professor at the University of Nicosia and director of the Institute For the Future IFF and Edouard Thieuleux founder of AbcSupplyChain discuss the general issues and challenges of demand forecasting and provide insights into best practices process models and discussing how data science and machine learning impact those forecasts The event will be moderated by Michael Gilliland marketing manager for SAS forecasting software <https://youtu.be/1rXjXcabW2s>
