**Running Randomized Evaluations** Rachel Glennerster, Kudzai

Takavarasha, 2013-11-24 A comprehensive guide to running randomized impact evaluations of social programs in developing countries. This book provides a comprehensive yet accessible guide to running randomized impact evaluations of social programs. Drawing on the experience of researchers at the Abdul Latif Jameel Poverty Action Lab, which has run hundreds of such evaluations in dozens of countries throughout the world, it offers practical insights on how to use this powerful technique especially in resource poor environments. This step by step guide explains why and when randomized evaluations are useful in what situations they should be used and how to prioritize different evaluation opportunities. It shows how to design and analyze studies that answer important questions while respecting the constraints of those working on and benefiting from the program being evaluated. The book gives concrete tips on issues such as improving the quality of a study despite tight budget constraints and demonstrates how the results of randomized impact evaluations can inform policy. With its self contained modules, this one of a kind guide is easy to navigate. It also includes invaluable references and a checklist of the common pitfalls to avoid. Provides the most up to date guide to running randomized evaluations of social programs especially in developing countries. Offers practical tips on how to complete high quality studies in even the most challenging environments. Self contained modules allow for easy reference and flexible teaching and learning. Comprehensive yet nontechnical.

**Books in Print**, 1987    **Data Base Directory**, 1987    *Applying Comparative Effectiveness Data to Medical Decision Making*

Carl Asche, 2015-11-30 This textbook introduces students to the basic concepts and methods used to measure and compare the expected benefits, risks, and cost of preventive and therapeutic medical interventions. It provides an easily accessible overview of comparative effectiveness and its practical applications to daily medical decisions. The book includes learning objectives for each topic, definitions of key terms, and topic summaries. Each chapter is written by a highly regarded academic and extensive reference is made throughout to other sources of literature where the interested reader can find further details. The book considers among other topics evidence based medicine and the role of comparative effectiveness research in the development of medical guidelines, bias and confounding, quality of life, randomized controlled trials, analyses of retrospective databases, screening, and economic evaluation. The book is intended to serve as a what is it, why do we need it, and how does it or could it effect positive change in health care rather than just a how to technical overview. As such it provides an essential resource for both undergraduate and post graduate students in health sciences.
