Creamer,2021-08-30 This groundbreaking book introduces an innovative new perspective on mixed method grounded theory methodology MM GTM by conceptualizing it holistically as a distinct qualitatively driven

methodology that appreciates the integrity of each of the methods it embraces. This practical and accessible text advocates for using MM GTM in a way that promotes meaningful interaction between qualitative and quantitative data during analysis. Its principal contribution is to provide a set of research tools to develop or refine a multi-faceted analytical framework in applied fields in the social and behavioral sciences including nursing. Used as either a resource or a textbook in a survey course about research methods the text references dozens of examples about how a dialectical exchange between different sources of data can be built into core grounded theory procedures including theoretical sampling coding case based memoing and integrated visual displays. With a whole chapter devoted to reporting the book also considers the way that indexes of quality that extend beyond methodological transparency can be used to evaluate research that partners mixed methods with grounded theory and other qualitative methods. Featuring student friendly pedagogy throughout including self-assessment questions a glossary and a framework that summarizes key points this text is an essential read for all research methods students or early career researchers ambitious to develop a theoretical perspective with qualitative mixed methods or evaluation. *CAD/CAM Abstracts*, 1992. Educational institutions usually require evaluation data to demonstrate effectiveness to funders and other stakeholders and to provide a measure of performance for marketing purposes. Educational evaluation is also a professional activity that individual educators need to undertake if they intend to continuously review and enhance the learning they are endeavouring to facilitate. This book presents new research on issues of vital importance to this field.
