

# To Use or Not to Use Modifier -25

Common clinical scenarios that demonstrate when modifier -25 is and is not appropriate.

A patient returns for a scheduled examination for neovascular age-related macular degeneration (AMD).

The patient received prior injections. The examination shows no evidence of complications from the previous treatments and it is determined that an additional injection is needed that day. Modifier -25 is appropriate in this situation.

A patient presents with recent vision loss in his left eye. Examination and imaging demonstrate active choroidal neovascularization (CNV) due to AMD.

The patient is treated with an intravitreal injection of an anti-VEGF drug. Modifier -25 is appropriate in this situation.

A patient who has received multiple intravitreal injections in her left eye to treat AMD returns to her specialist complaining of vision changes in her

right eye. Examination reveals progressive geographic atrophy in the right eye and active CNV in the left eye. The left eye is injected with an anti-VEGF drug. Modifier -25 is appropriate in this situation.

A patient is on a PRN treatment regimen for CNV in her left eye. The patient did not receive treatment at the last visit.

Today, active CNV is noted on examination and imaging. The patient's left eye is injected. Modifier -25 is appropriate in this situation.

A patient with bilateral CNV returns for follow-up. Examination and imaging confirms bilateral active CNV. The right eye is injected today. The patient returns in 3 days for injection of the left eye. Modifier -25 is appropriate for the right eye, but NOT when the patient returns for the previously determined injection in the left eye.

A patient returns for a previously scheduled injection in the left eye. Ocular examination confirms the need for the injection. Modifier -25 is NOT appropriate in this situation.

A patient on a treat-and-extend regimen returns 6 weeks after an injection in his right eye. The patient's left eye is examined and found to have high-risk dry AMD. His right eye is injected, and he is scheduled for another injection in 8 weeks. Modifier -25 is appropriate in this situation because the examination of the left eye is medically necessary and is a significant, separately identifiable service from the injection.
