

Answer the following questions in your own words using the textbook as your resource. Answer with complete sentences.

1. Use the following terms in sentences that explain the relationship between the terms:
a. genes
b. alleles

Explain each concept with regard to differences in frequency of different genes within a population and how it is associated with an individual's genes.

2. Use the following terms in sentences that explain the relationship between the terms:
a. evolution
b. trait
c. variation

Explain how traits, populations, and other ways of describing the genetic pool in populations may tell you about how the genetic composition of a population changed over time. **Explain how traits and genes contribute to the genetic composition of a population.**

3. What are the five themes of geography? Why are they important?

The five themes of geography are location, place, region, movement, and human-environment interaction. There are things that humans change geography such as the way in which people in a country organized different regions.

4. What are the different characteristics of genes and traits?

Genes are a segment of DNA that codes for a trait. They are the physical basis of inheritance and are passed on from parents to offspring. Traits are the characteristics of an organism that are determined by the genes it has. They are the observable characteristics of an organism. Genes and traits are related in that genes are the physical basis of inheritance and traits are the observable characteristics of an organism. **Explain how genes and traits are related.**

5. What is the difference between a gene and a trait? Why are they important?

The difference between a gene and a trait is that a gene is a segment of DNA that codes for a trait, while a trait is the observable characteristic of an organism. **Explain how genes and traits are related.**

6. How do different genes affect an organism?
