Equipment Qualification in the Pharmaceutical Industry Steven

Ostrove, 2019-06-13 Equipment Qualification in the Pharmaceutical Industry provides guidance and basic information for the preparation of a quality qualification program. It has been noted that there is a general lack of understanding in the industry, especially for those new to the industry, as to what constitutes a compliant qualification program. Even experienced professionals have felt a lack of security in reaching a compliant state. This book outlines a guideline for the preparation and execution of qualification protocols including the installation, IQ, operational, OQ, and performance PQ protocols. It discusses the importance of related qualification programs, e.g., quality systems, commissioning, computer system, and cleaning, and how to incorporate them into a fully compliant qualification program. Furthermore, it provides matrices of what could be included in each type of protocol for major types of process equipment. While primarily for people entering the pharmaceutical industry, those established in the field will benefit from the multiple examples and matrices, as well as integration of related systems. Equipment Qualification in the Pharmaceutical Industry provides students and pharmaceutical scientists a guideline for the preparation and execution of qualification, installation, operational, and performance protocols. Incorporates good manufacturing processes into a compliant qualification program. Provides examples of protocol layout. Includes matrices for major process equipment: installation, quality, operational, quality, and performance, quality requirements. *Christian Home*
