**Supportive Smart Homes** Frank Knoefel, Bruce Wallace, Neil Thomas, Heidi Sveistrup, Rafik Goubran, Christine L. Laurin, 2023-09-23 Significant health industry human resource needs increase the reliance on family and friends to support older adults hoping to age in place. This book explores how recent improvements in integrated home technologies have the potential to address those challenges. The book considers how embedded home sensors can be used to monitor the health and wellbeing of older adults and how that can be used to assist with supporting safety and well being. The content is designed to help multiple stakeholders in the supportive smart home space to better understand the complexity of this field and the need for transdisciplinary collaboration. These stakeholders include the older adults who will benefit from supportive smart home technology, informal and formal caregivers and healthcare professionals concerned about the older adult's well being, researchers from multiple disciplines in the supportive smart home area and their funders companies looking to develop solutions and services or expand their offerings, policy makers who want to ensure privacy and equity in access and a successful integration of these technologies into the evolving health and social services sectors and students the future leaders in AgeTech. Overall the intent of the book is to inspire engineers, computer scientists, industrial designers, clinicians and healthcare providers, social scientists, students, policy makers and older adults and their caregivers to collaborate in advancing the supportive smart home space to develop more options for aging in place.

New Frontiers for Design of Interior Lighting Products Andrea Siniscalco, 2021-05-27 This book explores the single components that commonly constitute luminaires for interiors, describing their operating principles, families, strengths and weaknesses. It opens with the product classification and main standard requirements. The following chapters describe the different components: light sources, power supplies, thermal dissipation techniques, control technologies, optical systems. The description focuses on the most recent technologies to allow the reader to consider a product design capable of confronting future lighting scenarios. The book provides a simple path addressed to all those who want to try their hand at designing luminaires for interiors even without a specific engineering background.
