Computer Algebra with SymbolicC++ Yorick Hardy, Kiat Shi Tan, W.-H. Steeb, 2008 First published in 1973 Professor Akenstone's book traces the series of religious and political controversies which have battered the state schools of Northern Ireland After the government's admirably intentioned but muddled attempt to create a non sectarian school system in the early 1920s the educational system was progressively manipulated by sectarianism The way in which the author describes how children are schooled reveals a great deal about the attitudes and values of the parental generation and also helps to explain the actions of later generations
