WHO global air quality guidelines Weltgesundheitsorganisation,World Health Organization,2021-09-07 The main objective of these updated global guidelines is to offer health based air quality guideline levels expressed as long term or short term concentrations for six key air pollutants PM2.5 PM10 ozone nitrogen dioxide sulfur dioxide and carbon monoxide In addition the guidelines provide interim targets to guide reduction efforts of these pollutants as well as good practice statements for the management of certain types of PM i.e. black carbon elemental carbon ultrafine particles particles originating from sand and duststorms These guidelines are not legally binding standards however they provide WHO Member States with an evidence informed tool which they can use to inform legislation and policy Ultimately the goal of these guidelines is to help reduce levels of air pollutants in order to decrease the enormous health burden resulting from the exposure to air pollution worldwide

Clinical Practice Guidelines We Can Trust Institute of Medicine,Board on Health Care Services,Committee on Standards for Developing Trustworthy Clinical Practice Guidelines,2011-06-16 Advances in medical biomedical and health services research have reduced the level of uncertainty in clinical practice Clinical practice guidelines CPGs complement this progress by establishing standards of care backed by strong scientific evidence CPGs are statements that include recommendations intended to optimize patient care These statements are informed by a systematic review of evidence and an assessment of the benefits and costs of alternative care options Clinical Practice Guidelines We Can Trust examines the current state of clinical practice guidelines and how they can be improved to enhance healthcare quality and patient outcomes Clinical practice guidelines now are ubiquitous in our healthcare system The Guidelines International Network GIN database currently lists more than 3 700 guidelines from 39 countries Developing guidelines presents a number of challenges

including lack of transparent methodological practices difficulty reconciling conflicting guidelines and conflicts of interest Clinical Practice Guidelines We Can Trust explores questions surrounding the quality of CPG development processes and the establishment of standards It proposes eight standards for developing trustworthy clinical practice guidelines emphasizing transparency management of conflict of interest systematic review guideline development intersection establishing evidence foundations for and rating strength of guideline recommendations articulation of recommendations external review and updating Clinical Practice Guidelines We Can Trust shows how clinical practice guidelines can enhance clinician and patient decision making by translating complex scientific research findings into recommendations for clinical practice that are relevant to the individual patient encounter instead of implementing a one size fits all approach to patient care This book contains information directly related to the work of the Agency for Healthcare Research and Quality AHRQ as well as various Congressional staff and policymakers It is a vital resource for medical specialty societies disease advocacy groups health professionals private and international organizations that develop or use clinical practice guidelines consumers clinicians and payers

Redesigning the Process for Establishing the Dietary Guidelines for Americans National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Food and Nutrition Board, Committee to Review the Process to Update the Dietary Guidelines for Americans, 2017-12-16 What foods should Americans eat to promote their health and in what amounts What is the scientific evidence that supports specific recommendations for dietary intake to reduce the risk of multifactorial chronic disease These questions are critically important because dietary intake has been recognized to have a role as a key determinant of health As the primary federal source of consistent evidence based information on dietary practices for optimal nutrition the Dietary Guidelines for Americans DGA have the promise to empower Americans to make informed decisions about what and how much they eat to improve health and reduce the risk of chronic disease The adoption and widespread translation of the DGA requires that they be universally viewed as valid evidence based and free of bias and conflicts of interest to the extent possible However this has not routinely been the case A first short report meant to inform the 2020 review cycle explored how the advisory committee selection process can be improved to provide more transparency eliminate bias and include committee members with a range of viewpoints This second and final report recommends changes to the DGA process to reduce and manage sources of bias and conflicts of interest improve timely opportunities for engagement by all interested parties enhance transparency and strengthen the science base of the process
