AACN's Clinical Reference for Critical-care Nursing Marguerite Rodgers Kinney, 1981 Book Alone: Nursing Research Janet Houser, 2011-05-24 **Critical Care Plans** Mary Frances Moorhouse, Marilyn E. Doenges, 1987. This care plan book serves as a guide for nurses who plan and promote health care for the critically ill patient. With the trends in health care of cost containment and shortened stays, patients in critical care units have higher acuity levels and stay for much shorter times than in the past. The average critical care nurse is forced to spend so much of the time coping with the technical aspects of the patient's care that the planning aspects tend to get shuffled to the background. The primary focus of this book is planning for holistic care in a setting where these life-threatening conditions are the primary concern. **Book Alone** Janet Houser, 2011-06-02. Essential for nursing research courses. *Nursing Research: Reading, Using, and Creating Evidence*, Second Edition, demonstrates how to use research as the basis for successful nursing practice. Fully updated and revised, this reader-friendly new edition provides students with the fundamentals of appraising and utilizing research. Organized around the different types of research in evidence-based practice, it addresses contemporary concerns, especially ethical and legal issues. Additionally, it explores both quantitative and qualitative traditions to encourage students to read, use, and participate in the research process.
