

# TWEE MODELLEN VAN ECONOMISCHE GROEI

ANGUS MADDISON

Er zijn twee hoofdmodellen voor economische groei: de model van de industrieel-gedreven groei en de model van de arbeidsgedreven groei.

De industrieel-gedreven groei is gebaseerd op de productiviteitsverhoging.

De arbeidsgedreven groei is gebaseerd op de arbeidsoptimalisatie (productiviteitsverhoging).

De arbeidsgedreven groei is gebaseerd op de arbeidsoptimalisatie.

## Twee Modellen Van Economische Groei:

**Twee modellen van economische groei** Angus Maddison,1971      **The banking and credit system of the USSR** O. Kuschpēta,2012-12-06 It is a pleasure to introduce Dr Kusehpeta's study of the USSR banking and credit system with some measure of enthusiasm for the subject is one about which there is as yet not much literature available in the Western European languages and this study approaches the subject from the view point of sources taken from within the Soviet Union itself. No matter how revolutionary the change some ties with the past still remain and it is for this reason that the author has paid initial attention to the banking system of the Tsars and proceeds to deal with the development of the banking system since the Revolution of 1917. While history has made the Communist Civil War the New Economic Policy and the Khrushchev reforms to be familiar to us the effects of these events on the banking and monetary system have thus far never been fully researched. Next the author deals extensively with the existing banking and credit system. This subject is not easy to understand because we are obliged to become familiar with totally different concepts than those governing the mixed economic system of the Western World. I personally am struck by the sharp separation between the currency and the deposit or transfer money circulation.      *Transnational Classes and International Relations* Kees Van der Pijl,2005-08-10 An exciting and original analysis of the development of capitalist classes such as the Freemasons that cross national boundaries in the global political economy. This innovative book focuses on an historical perspective on class formation under capitalism and its transnational integration international relations between the English speaking centre of capital and successive contender states. The author develops a broad ranging and thorough understanding of class in the process of globalization. He does so within several theoretical frameworks shedding much light on this important topic.      *Global Rivalries From the Cold War to Iraq* Kees van der Pijl,2006-08-20 This book offers a highly original analysis of world events in the light of the Iraq War. It explores the history and development of relations between major countries in the international community and the impact that successive wars and changes in the global political economy have had on the way states relate to each other today. Tracing the liberal state structure back to the closing stages of the English Civil War and settlement in North America it argues that the rise of the English speaking West has created rivalries between contender states that are never entirely put to rest. With each round of Western expansion new rivalries are created. Offering a truly global analysis that covers every area of the world from Europe and America to China the Middle East Latin America and Russia he analyses the development of international relations post WWII and questions whether the neoliberal project and its human rights ideology have collapsed back into authoritarianism under the guise of the war on terror.      **Macro-economie** Freddy Heylen,1999 Het boek biedt inzicht in de evolutie van macro economische variabelen en in hun onderlinge samenhang. Met voorbeelden en toepassingen uit de praktijk visies van verschillende macro economische scholen recente ontwikkelingen in conjunctuur en groeitheorie en macro economisch beleid.      **Macro-economie.
