

# Two Way Tables

A two way table is a type of frequency table used for organising data. We need a data set with two categorical variables.

Example This two way table shows a data set about what students eat for lunch.

The first column shows the type of food chosen.

	Boys	Girls	Total
Cooked food	18	22	40
Packed lunch	17	33	50
Total	35	55	90

The top row shows boy or girl.
