Homing pigeons have an innate ability to find their way home and to their own nests over extremely long distances—even from places they have never been before. Scientists think that homing pigeons use a variety of skills to navigate—identifying the magnetic north, following man-made roads, using the earth's gravity, or even recognizing landmarks or certain smells.

People have used homing pigeons for over three thousand years. In 776 B. C., pigeons were used to let the people know the winners of the first Olympic games. Pigeons were also used during both World War I and World War II. Pigeons carried messages from sinking ships and across enemy lines. These pigeons saved thousands of lives. Some pigeons were even given medals for their heroism during war time.

When carrying messages, homing pigeons are called carrier pigeons or messenger pigeons. A message is written on a tiny slip of paper. The paper is rolled into a small tube attached to the pigeon's leg. The pigeon is able to carry the message over long distances to its home, sometimes as far as 1,100 miles away!
