## Type Transformations:

Specification and Transformation of Programs Helmut A. Partsch, 2012-12-06 Specification and transformation of programs is short for a methodology of software development where from a formal specification of a problem to be solved programs correctly solving that problem are constructed by stepwise application of formal semantics preserving transformation rules. The approach considers programming as a formal activity. Consequently it requires some mathematical maturity and above all the will to try something new. A somewhat experienced programmer or a third or fourth year student in computer science should be able to master most of this material at least this is the level I have aimed at. This book is primarily intended as a general introductory textbook on transformational methodology. As with any methodology reading and understanding is necessary but not sufficient. Therefore most of the chapters contain a set of exercises for practising as homework. Solutions to these exercises exist and can in principle be obtained at nominal cost from the author upon request on appropriate letterhead. In addition the book also can be seen as a comprehensive account of the particular transformational methodology developed within the Munich CIP project.

*Structured Object-Oriented Formal Language and Method* Shaoying Liu, Zhenhua Duan, 2016-03-17 This book constitutes the thoroughly refereed post workshop proceedings of the 5th International Workshop on Structured Object Oriented Formal Language and Method SOFL MSVL 2015 held in Paris France in November 2015. The 15 papers presented in this volume were carefully reviewed and selected from 22 submissions. The focus of this workshops was on following subjects: Modeling, specification, verification, model checking, testing, debugging, transformation and algorithm.

Progress in Optics Taco Visser, 2016-04-08 The Progress in Optics series contains more than 300 review articles by distinguished research workers which have become permanent records for many important developments helping optical scientists and optical engineers stay abreast of their fields. Comprehensive in depth reviews. Edited by the leading authority in the field.

## Python Data Cleaning and Preparation

**Best Practices** Maria Zervou, 2024-09-27 Take your data preparation skills to the next level by converting any type of data asset into a structured, formatted and readily usable dataset. Key Features: Maximize the value of your data through effective data cleaning methods. Enhance your data skills using strategies for handling structured and unstructured data. Elevate the quality of your data products by testing and validating your data pipelines. Purchase of the print or Kindle book includes a free PDF eBook. Book Description: Professionals face several challenges in effectively leveraging data in today's data driven world. One of the main challenges is the low quality of data products often caused by inaccurate, incomplete or inconsistent data. Another significant challenge is the lack of skills among data professionals to analyze unstructured data, leading to valuable insights being missed that are difficult or impossible to obtain from structured data alone. To help you tackle these challenges, this book will take you on a journey through the upstream data pipeline, which includes the ingestion of data from various sources, the validation and profiling of data for high quality end tables, and writing data to different sinks. You'll focus

on structured data by performing essential tasks such as cleaning and encoding datasets and handling missing values and outliers before learning how to manipulate unstructured data with simple techniques You ll also be introduced to a variety of natural language processing techniques from tokenization to vector models as well as techniques to structure images videos and audio By the end of this book you ll be proficient in data cleaning and preparation techniques for both structured and unstructured data What you will learn Ingest data from different sources and write it to the required sinks Profile and validate data pipelines for better quality control Get up to speed with grouping merging and joining structured data Handle missing values and outliers in structured datasets Implement techniques to manipulate and transform time series data Apply structure to text image voice and other unstructured data Who this book is for Whether you re a data analyst data engineer data scientist or a data professional responsible for data preparation and cleaning this book is for you Working knowledge of Python programming is needed to get the most out of this book **Matrices and Determinoids** Cuthbert Edmund Cullis,1925 Geometry and Collineation Groups of the Finite Projective Plane PG (2,22) ...
