It takes the team through the process of planning out the goals/objectives to be targeted in each activity of the day, the modifications and accommodations that should be provided to support the student in each activity, the sensory supports to help the student stay engaged, and the communication and social supports that the student needs to be successful. In addition, it identifies the type of data that should be collected for each area and the reinforcers that have been chosen for use for success. As with many tools, while this system was developed for use with individuals on the autism spectrum, it can be an essential tool for any student regardless of the types of supports and needs they have.
