Remote Jobs Review:

Remote Work, Internal Marketing and Human Resource Management Teena Mishra, 2024-12-02 Remote working is a developing idea that many organizations are embracing especially in light of COVID 19 and the rise in demand for remote and hybrid roles. As there is no standard model to use for implementation, a number of problems and difficulties develop as popularity increases and hybrid working environments become normalized. This book presents the views, opinions, and reality of remote work and creating an appropriate internal marketing culture in a remote environment. The key topics explored are the significance of remote work, remote work practice, reshaping the work environment, designing remote work models, remote work challenges, remote work facing business organizations, remote work management innovations and technology, the role of motivation and satisfaction in organizational development, employee empowerment in a remote setting, transparency and commitment for sustainable development, and the future of remote work. This research volume will be of value to researchers, academicians, practitioners, and students in the fields of human resource management, organizational studies, and innovation management.

Data-Driven Policy Impact Evaluation Nuno Crato, Paolo Paruolo, 2018-10-02 In the light of better and more detailed administrative databases, this open access book provides statistical tools for evaluating the effects of public policies advocated by governments and public institutions. Experts from academia, national statistics offices, and various research centers present modern econometric methods for an efficient data-driven policy evaluation and monitoring, assess the causal effects of policy measures, and report on best practices of successful data management and usage. Topics include data confidentiality, data linkage, and national practices in policy areas such as public health, education, and employment. It offers scholars as well as practitioners from public administrations, consultancy firms, and nongovernmental organizations insights into counterfactual impact evaluation methods and the potential of data-based policy and program evaluation.
