

Daily SAT Practice ANSWER KEY

Week 1

DETAILED EXPLANATION

DAY 1

The correct answer choice is **D**. This answer choice properly computes the tax and cost associated with the purchase of each ticket. First the sales tax of 7.5% is converted to its decimal equivalent of 0.075. However this number alone only represents the tax portion of the purchase. A one (1) must be added to percentage decimal in order to get the total cost multiplier to apply, when multiplied by T . This total is then added to $5T$ to get the cumulative tax-exempt surcharge amount.

Answer choice **A** is incorrect because it does not correctly apply the percentage. Selecting this answer choice may indicate a lack of proper understanding of percentages as it relates to converting a percent to decimal.

Answer choice **B** is incorrect because the \$5 surcharge is not applied to each ticket as required in the word problem. Selecting this answer choice may indicate an improper understanding of the word problem. Notice that the charge is only applied one time. Notice that answer choice **D** (the correct answer choice) is just like answer choice **B** except the \$5 surcharge is applied to each ticket as denoted by " $5T$ ".

Answer choice **C** is incorrect because the actual cost of the tickets is not properly computed using this expression. Instead only the tax and the surcharges will be computed. Notice that answer choice **D** (the correct answer choice) is just like answer choice **C** except the tax and the cost of the tickets are properly computed as denoted by " 1.075 ". Selecting this answer choice may indicate an insufficient understanding on how to calculate a value that is comprised of the sum total of a value along with a percentage of that same value.
