Mamadou Diawara, Elísio S. Macamo, Jean-Bernard Ouédraogo, 2019-01-17 How realistic is it to expect translation to render the world intelligible in a context shaped by different historical trajectories and experiences Can we rely on human universals to translate through the unique and specific webs of meaning that languages represent If knowledge production is a kind of translation then it is fair to assume that the possibility of translation has largely rested on the idea that Western experience is the repository of these human universals against the background of which different human experiences can be rendered intelligible The problem with this assumption however is that there are limits to Western claims to universalism mainly because these claims were at the service of the desire to justify imperial expansion This book addresses issues arising from these claims to universalism in the process of producing knowledge about diverse African social realities It shows that the idea of knowledge production as translation can be usefully deployed to inquire into how knowledge of Africa translates into an imperial attempt at changing local norms institutions and spiritual values Translation in this sense is the normalization of meanings issuing from a local historical experience claiming to be universal The task of producing knowledge of African social realities cannot be adequately addressed without a prior critical engagement with how translation has come to shape our ways of rendering Africa intelligible **Slave Species of God**

Michael Tellinger, 2017-07-26 Were humans created by god as SLAVES Was Abraham the first human SPY Was Jesus an accidental MESSIAH Michael Tellinger takes the readers on a remarkable odyssey of the true origins of humankind He masterfully weaves together a very different tale of our origins by connecting the dots between history archaeology mythology religion scientific breakthrough genetics and the startling information derived from the Sumerian clay tablets He points out the critical difference between the GOD with a big G and the gods with a small g clearing up millennia of confusion and conflict in the name of God In Slave Species of god Tellinger achieves the following draws clear and startling analogies between new discoveries in genetic engineering and ancient archaeological finds highlights emerging scientific information overlooked in the past unravels the Bible's often obscure stories by linking these to their original forms in Sumerian clay tablets and other prehistoric writings provides explicit answers to why our modern world has become so senseless and chaotic by revealing the very secrets of our prehistory While shattering myths about evolution and God Slave Species of god enables evolutionists and creationists to finally coexist in one pond The arguments are compelling simple and refreshing retracing the path of human evolution from the murky distant past to the religious dogma that haunts humankind today The question of who we are and where we come from takes on a new meaning as we discover that our DNA may have been manipulated by our CREATOR some 250 000 years ago to produce a less intelligent primitive species Tellinger delivers compelling evidence that Adam and

Eve were not the apple of God s eye as first suggested in Genesis Tellinger presents the many arguments and evidence succinctly and convincingly pointing out the difference between GOD and god How did this genetic manipulation affect humankind How have we evolved in 250 000 years Can we achieve immortality These are just some of the questions answered in this gripping and astonishing work challenging all those who are looking for new answers in the 21st century

**Adam's Calendar** Johan Heine,Michael Tellinger,2008 Archaeological discoveries that answer the questions concerning the origins of man    **Temples of the African Gods** Michael Tellinger,Johan Heine,2009 Archaeologists have recently discovered that the first civilization were also the people who carved the first Horus bird the first Sphinx built the first pyramids and built an accurate stone calendar right in the heart of it all Adam s Calendar is the flagship among millions of circular stone ruins ancient roads agricultural terraces and thousands of ancient mines left behind by a vanished civilisation which we now call the First People They carved detailed images into the hardest rock worshipped the sun and are the first to carve an image of the Egyptian Ankh key of life and universal knowledge 200 000 years before the Egyptians came to light This book graphically exposes these discoveries and will be the catalyst for rewriting our ancient human history The book is a continuation of Tellinger s previous books Slave Species of God and Adam s Calendar Publisher description    **Ubuntu**
