## **UCLA Geriatric Knowledge Test:**

**Medical Education in Geriatrics** Andrea Wershof Schwartz, 2024-08-10 *Medical Education in Geriatrics Strategies for Teaching the Care of Older Adults* provides an overview of evidence based strategies for teaching geriatrics in medical education. This book is for clinician educators both for those with geriatrics expertise seeking to increase their knowledge and skill in education and for those medical educators seeking to expand their knowledge of how to teach geriatric principles to their learners and thereby prepare them to care for older adults. Written by experts and leaders in Geriatric Medical Education from across the US and Canada *Medical Education in Geriatrics* highlights approaches for creating effective educational experiences in geriatrics for learners ranging from pre clinical medical students through residency fellowship and continuing medical education as well as interprofessional education with an emphasis on evidence based engaging and memorable teaching strategies. The book also provides strategies for teaching geriatrics in a variety of settings including the hospital outpatient settings, nursing home, home care and telemedicine. Additional chapters address considerations in teaching geriatrics including Diversity, Equity and Inclusion, Providing Feedback, assessment in geriatric medical education, online resources and other topics that will help educators deliver excellent medical education in geriatrics. *Medical Education in Geriatrics Strategies for Teaching the Care of Older Adults* provides practical and evidence based strategies for teaching principles of geriatrics in a variety of settings and will be a valuable and practical resource for geriatricians, palliative medicine specialists and trainees, family medicine and internal medicine clinicians and medical educators, medical educators in pre clinical and clinical settings, residency and fellowship directors and medical students and residents interested in geriatrics and the care of older adults.

**Principles and Practice of Geriatric Surgery** Ronnie Ann Rosenthal, Michael E. Zenilman, Mark R. Katlic, 2011-07-12 In the preface to this impressive and well produced book the editors state that their aim is not to describe a new surgical specialty since most surgeons will soon need to be geriatric surgeons but to assemble a comprehensive account that will allow all providers of healthcare to the elderly to understand the issues involved in choosing surgery as a treatment option for their patients. This is a useful book that deserves to do well. I hope that the editors and their publisher will have the stamina to make this the first of several editions as it is clear that updated information about surgery in the elderly will be required to keep pace with this important field. *NEJM Book Review*

**UCLA Geriatrics & Gerontology News**, 1995 **Geriatric Practice** Audrey Chun, 2019-10-29 This book serves as a comprehensive reference for the basic principles of caring for older adults directly corresponding to the key competencies for medical student and residents. These competencies are covered in 10 sections each with chapters that target the skills and knowledge necessary for achieving competency. Each of the 45 chapters follow a consistent format for ease of use beginning with an introduction to the associated competency and concluding with the most salient points for mastery. Chapters also include brief cases to provide context to the clinical reasoning behind the competency, strengthening the core understanding necessary to
